General note: These quarterly statements have not been audited. The consolidated accounts of the BBVA Group have been drawn up according to the International Financial Reporting Standards (IFRS) adopted by the European Union and in conformity with Bank of Spain Circular 4/2004, together with the changes introduced therein. As for the stake in Garanti Group, the information is presented on an on-going basis, accounted for by the proportional consolidation method and, therefore, without early application of the IFRS 10, 11 and 12.

(1) They do not include the assets under management by pension fund administrators in Chile, Mexico, Colombia and Peru.
(2) Basic earnings per share which includes the eventual dilution of the contingent convertible securities into shares, issued in the second quarter of 2013.
(3) Excluding Garanti.
In the fourth quarter of 2013 recurrence in revenue, stability in the asset quality indicators, improved liquidity and sound solvency ratios have again been the most relevant aspects of the BBVA Group’s results. In addition, there has been the impact of the completed corporate operations: the sale of BBVA Panama and the Provida pension fund administrator (AFP Provida), as well as the signing of the new agreement with CITIC Limited, which includes the sale of the 5.1% stake in China Citic Bank (CNCB).

1. The most significant aspects of earnings in the quarter are summed up below:

- Good performance of recurring income (net interest income plus income from fees and commissions), which has risen 5.0% over the previous quarter. Particularly notable is the upturn in net interest income over the period, which has risen again after two quarters of decline (influenced by the unfavorable impact of the so-called “floor clauses”). Income from fees and commissions has also been positive.

- There has been a slowdown in the year-on-year growth of operating expenses, thanks to the cost control policy applied in Spain and the United States, which has offset the effect of the expansion projects underway in emerging countries.

- Loan-loss provisions were more contained, after the rise registered in the third quarter of 2013 due to the classification of refinanced loans.

- Capital gains of €653m net of tax were generated from the final closing of the sales of BBVA Panama to the Aval Group and the Chilean AFP Provida to subsidiaries of Metlife, Inc.

- The signing of an agreement with the CITIC Group, which includes the sale of the 5.1% stake in CNCB. As a result of this agreement, the remaining 9.9% stake held by the Group has been classified as available-for-sale. This has had a negative effect (aprox. −€2,600m before tax) as all the stake held by BBVA in CNCB at the time of reclassification has been marked to market.

- Another quarter with a negative impact from exchange rates.

- As a result, the net attributable profit for the period October-December 2013 was a negative €849m, and for the whole year it was €2,228m (up 32.9% year-on-year). Excluding the effects of the corporate operations carried out over the year, real-estate activity in Spain and the classification of refinanced loans carried-out in the third quarter of 2013, the net attributable profit amounts to €3,195m, a decline of 28.9% over the last 12 months.

2. In business activity, the same trends mentioned in recent quarters have been maintained. Lending continues to fall in Spain, in contrast with the growth seen in the rest of geographical areas. However, customer funds have performed very well in all areas, supported strongly by the performance of transactional accounts. This has been achieved against the background of the negative effect of exchange rates.

3. The Group’s liquidity, and the commercial gap, once more improved, above all in the euro balance sheet, where the gap fell by €11 billion over the last 3 months (€33 billion in the full year). The good performance of on-balance-sheet deposits has supported this positive trend.

4. The Group’s solvency ratios continue to evolve very favorably, with core capital at the end of the year at 11.6%, according to Basel II regulations. It should be noted that the reduction of BBVA’s stake in CNCB will bring an important improvement of the Group’s core capital, calculated according to Basel III requirements.

5. Risks have evolved over the quarter in line with expectations, with a slight upward move in the NPA ratio in Spain, due not so much to the level of non-performing loans (which fell over the quarter), but rather to the fall in the volume of the loan book. In the rest of the areas, the improvement of Mexico and the US stands out. Eurasia shows a slight deterioration (lower leverage and negative effect of exchange rates) and South America shows stability.

6. Lastly, as regards shareholder remuneration, a new policy for dividend distribution was announced in the quarter. It will pay shareholders in cash, in line with earnings and the Group’s growth profile. This shift toward a 100% cash remuneration will be accompanied by a complement to the cash dividend in the form of the “dividend-option” system during the transition period.
Earnings

The keys to earnings in the **fourth quarter of 2013** for the BBVA Group are summed up below:

1. A quarterly increase of **recurring revenue** as a result of the upturn in net interest income and a new rise in income from fees and commissions.

2. Favorable performance of net trading income (**NTI**), confirming its positive trend shown over the year.

3. Receipt of the Telefónica **dividend**, after being suspended temporarily since July 2012.

4. Reduction in the **other operating income and expenses** heading, due to a more negative impact than in previous quarters of the adjustment for hyperinflation in Venezuela and the accounting for the exceptional payment to the Deposit Guarantee Fund (DGF) in Spain in compliance with Royal Decree-Law 6/2013.

5. **Operating expenses** for the quarter were practically the same as for the same period the previous year.

6. The level of **provisions** was below that of previous quarters.

7. Closing of several **corporate operations**: the sales of AFP Provida and BBVA Panama and the signing of a new agreement with CITIC Limited that includes the sale of 5.1% in CNCB, which has involved valuing all of BBVA’s stake in CNCB marked to market. With the aim of guaranteeing a homogenous comparison of the accounts, all the effects derived from these Group decisions (and of similar decisions from previous periods) have been transferred to a new

**Notes:**

1. Pro forma financial statements with Garanti Group accounted for by the proportional consolidation method, without early application of the IFRS 10, 11 and 12.
2. Adjusted excluding the results from corporate operations, the result of real-estate activity in Spain and the classification of refinanced loans.
3. Basic earnings per share which includes the eventual dilution of the contingent convertible securities into shares, issued in the second quarter of 2013.
heading, called “results from corporate operations”, and the historical series have been reconstructed.

8. Significant negative impact in the quarter from exchange rates.

9. As a result of the above, the net attributable profit generated in the quarter was a negative €849m.

**Gross income**

BBVA obtained gross income of €5,321m between October and December 2013, an increase of €135m on the previous quarter. This positive performance was once more boosted by recurring revenue (net interest income plus income from fees and commissions).

Net interest income totals €3,760m, the highest quarterly figure in 2013. It has recovered the upward trend after a decline in the previous quarter, basically as a result of the elimination of the “floor clauses” on May 9. The favorable performance now is basically due to the improvement in the cost of funding
Overall, the Group has demonstrated a high level of resilience and great capacity to generate recurring revenues, which over the year as a whole amounted to €19,044m. This figure is 2.2% down on the same period in 2012, but up 3.5% excluding the exchange-rate effect.

Quarterly income from fees and commissions totals €1,139m, also the highest figure registered in 2013. For the year as a whole, this heading amounted to €2,527m, 43.0% above the figure for the same period the previous year.

The dividends heading has registered a figure of €114m for the quarter. Of particular importance has been the remuneration from the stake in Telefónica, which was suspended temporarily in July 2012 and paid again in November 2013, as planned. In the year as a whole, total dividends received amounted to €365m.

Income by the equity method stands at €53m in the fourth quarter and €72m in 2013 as a whole. These figures do not include the earnings from CNCB, as with the aforementioned signing of the agreement with CITIC, BBVA’s current stake in CNCB is now considered available-for-sale. To guarantee a homogenous comparison, the historical series have been reconstructed, transferring the income by the equity method (excluding dividends) from CNCB corresponding to previous quarters to the new heading of earnings from corporate operations, as mentioned at the start of this chapter.

Lastly, other operating income and expenses, at a negative €353m in the quarter and a negative €612m for the year as

</table>
a whole, continues to reflect the good performance of the insurance business in all the geographical areas, although also a more negative effect than in 2012 of hyperinflation in Venezuela. Also influencing negatively is the increased contribution to the deposit guarantee schemes in the different regions where BBVA operates, including the exceptional payment in the fourth quarter to the Spanish Deposit Guarantee Fund in compliance with Royal Decree-Law 6/2013, dated March 22.

In conclusion, gross income performed well in 2013, at €21,397m, a year-on-year decline of 2.3%, but an increase of 2.6% not taking into account currency depreciation.

**Operating income**

**Operating expenses** in the last quarter amount to €2,852m, practically the same figure as in the same period in 2012. The cumulative figure for the year is €11,201m, with a slowdown of its year-on-year increase to 3.8% (8.4% at constant exchange rates). The policy of cost control applied in developed countries has largely offset the execution of plans for investment in technology and the expansion projects in emerging areas.

The number of employees, branches and ATMs has been affected by the changes in the scope of consolidation in the quarter (the sale of BBVA Panama and AFP Provida Chile). Excluding these two companies:

- The number of people working in BBVA as of 31-Dec-2013 is 109,305. By geographical areas, there has been an increase in practically all the countries in South America, while in the rest of the areas it has fallen.
- The total number of branches at the close of December was 7,512 units. By geographical areas the number has risen in South America, above all in Colombia, Peru and Venezuela, has fallen in Spain (the process of integrating Unnim), and has remained without significant changes in the rest of the areas.

### Efficiency

- **Gross income**
  - 2011: €19,528
  - 2012: €21,892
  - 2013: €21,197

- **Operating cost**
  - 2011: €9,737
  - 2012: €10,786
  - 2013: €11,201

- **Efficiency ratio (Percentage)**
  - 2011: 49.9
  - 2012: 49.3
  - 2013: 52.3

</tr>
</tbody>
</table>

(1) At constant exchange rates -26.6%

### Provisions and others

Impairment losses on financial assets in the last three months (€1,210m) were down on those recorded in the other quarters of 2013 and particularly in the third quarter, when there was a one-off increase due to the effect of classifying refinanced loans. For the year as a whole, this item amounts to €5,776m, 27.6% down on the figure for 2012, which included impairment on assets related to the real-estate sector in Spain.

Provisions totaled €196m for the quarter and €630m for the year; €21m down on the figure for 2012. This heading includes, among other items, early retirement costs, provisions for contingent liabilities, contributions to pension funds and other commitments to staff.

Other gains (losses) include various items, such as the provisions made for real-estate and foreclosed or acquired assets in Spain. It totaled a negative €382m in the last quarter of 2013 and a negative €1,040m in the year as a whole.

Lastly, the new heading earnings from corporate operations includes the following items in 2013: earnings from the Group’s pension business in Latin America, including the capital gains from the sale of the different companies (Mexico in the first quarter, Colombia and Peru in the second, and Chile in the fourth); the capital gains from the sale of BBVA Panama (fourth quarter); the capital gains generated by the reinsurance operation on the individual life and accident insurance portfolio in Spain (first quarter); and the effect of the new agreement with the CITIC Group (fourth quarter), basically valuing BBVAs stake in CNCB marked to market. The previous quarters included income by the equity method for CNCB (not including dividends). In 2012, this item includes the badwill generated in the Unnim operation, the result from the sale of BBVA Puerto Rico and the historical figures of the pension business and the income by the equity method of CNCB, as the historical series have been reconstructed to make it more homogenous and comparable.
Net attributable profit

In 2013 BBVA has generated a net attributable profit of €2,229m, above the figure of €1,676m in 2012. If the effect of corporate operations, earnings from the real-estate activity in Spain and the provision made in the third quarter of 2013 as a result of the classification of refinanced loans is not included in this figure, the Group’s adjusted net attributable profit in 2013 would be €3,195m, compared with €4,490m in 2012.

As a result, earnings per share (EPS) stand at €0.39 (€0.56 adjusted), return on total average assets (ROA) 0.48% (0.64% adjusted), return on equity (ROE) 5.0% (7.1% adjusted) and return on tangible equity (ROTE) 6.0% (8.6% adjusted).

By business area. Spain has contributed €583m, real-estate activity in Spain generated a loss of €1,254m, while the United States contributed €390m, Eurasia €454m, Mexico €1,805m and South America €1,249m.

(1) Adjusted.
At the close of **December 2013**, the BBVA Group’s balance sheet and business activity closely reflected the trends mentioned in previous quarters:

- **The exchange rates** that most influence the Group’s financial statements have continued to lose against the euro. As a result, their effect is negative, both over the quarter and in the last 12 months.

- **Loans and advances to customers (gross)** has fallen by 1.9% over the quarter and 4.7% on the figure at the end of 2012. In addition to the aforementioned impact of exchange rates, lending in Spain has fallen back again, partly due to the early repayment under the Supplier Payment Fund in November.

- **Non-performing loans** declined by 11% over the last 3 months, with falls both in the domestic (-0.3%) and non-domestic sector (-4.2%). However, over the last 12 months, this item has increased by 27.3%. The classification of refinanced loans carried out in the third quarter in Spain has had a significant impact on these figures.

**Memorandum item:**

- Contingent liabilities: 36,437

(1) Pro forma financial statements with Garanti Group accounted for by the proportional consolidation method, without early application of the IFRS 10, 11 and 12.
• Customer funds continue to perform very well in all geographical areas, with a favorable impact on the Group’s commercial gap.

- Deposits from customers increased by 2.1% over the quarter and 6.0% over the 12 months, thanks to the good performance of deposits in the retail sector and the recovery of wholesale balances.

- All the different types of off-balance-sheet funds also performed well.

• Lastly, total equity has fallen by 5.4% since September 2013. The impact on quarterly earnings of the signing of a new agreement with the CITIC group and the negative effect of exchange rates are the two basic reasons explaining this decline.

(1) They do not include the assets under management by pension fund administrators in Chile, Mexico, Colombia and Peru.

---

(1) At constant exchange rates +12.2%
The key factors that affected the Group’s capital base in the fourth quarter of 2013 are as follows:

- Improvement of the core capital ratio, according to Basel II, to 11.6%, 19 basis points higher than at the close of September. Organic generation of earnings, together with the divestments in BBVA Panama and AFP Provida and a reduction in risk-weighted assets (RWA) (affected by the exchange rate) offset the negative impact on core capital of the sale of 51% of CNCB.

- Improvement in the Tier I and Tier II ratios by 79 and 53 basis points, respectively, during the quarter. This is mainly due to the sale of CNCB since, because the remaining stake (9.9%) does not exceed the 10% limit, it is not deducted in the capital base.

- As a result, the BIS II ratio is 14.9%, a quarterly increase of 132 basis points.

- RWA amount to €323,605m as of 31-Dec-2013, a decline of 0.6% over the last 3 months and mainly due to the exchange rate and lower activity in Spain. As the remaining stake in CNCB is not deducted, it increases the RWA and partially offsets the aforementioned reduction.

- Lastly, the new capital requirements included in the European directive CRDIV, commonly known as Basel III (BIS III) came into effect in January 2014. The Group is extremely well positioned with respect to this new regulation:
  - The reduction in BBVA’s stake in CNCB to under 10% means a 71 basis points improvement in the core capital calculated under BIS III fully loaded regulation.
  - Royal Decree 14/2013 of November 29, which establishes that certain deferred tax assets are to be converted into accounts receivable from the Tax Authority, implies that they do not have to be deducted from the core BIS III ratio. This new regulation is estimated to have a positive effect on the Group’s BIS III fully loaded core capital ratio of between 60 to 70 basis points.

In short, BBVA’s solvency ratios continue to be well managed, ensuring the Group’s capital adequacy position is strong.

Risk management

Credit risk

At the close of the fourth quarter of 2013, the Group’s main asset quality indicators have evolved according to forecast:

- An uptick in the NPA ratio in Spain to 10.3% (6.4% excluding real-estate activity) as a result of another decline in the area’s loan book, as non-performing assets were down €145m in the quarter. The coverage ratio remains at the levels reported at the close of 30-Sep-2013.
- In the rest of the geographical areas, improvement in the asset quality indicators in the United States and Mexico, slight deterioration in Eurasia (due to the deleveraging process in Europe and the exchange-rate effect in Turkey) and stability in South America.

As of 31-Dec-2013, the Group’s total risks with customers (including contingent liabilities) totaled €386,401m. This represents a decrease of 1.8% over the quarter and 5.1% over the last twelve months, due basically to the negative impact of exchange rates and a further decline in lending activity in Spain.

The balance of non-performing assets as of 31-Dec-2013 was €26,243m, very similar to the €26,508m reported at

the close of September 2013. This was due to the effect of exchange rates and to the fact that non-performing loans in Spain fell slightly in relation to the figure posted at the end of the preceding quarter, when there had been a significant increase as a result of the classification of refinanced loans in both banking and real-estate activity. In terms of variation in NPA, gross additions declined and recoveries increased over the last 3 months, with net additions to NPA ending the period at €993m, a 80.7% reduction compared to the figure at the close of September. As a result, the ratio of recoveries to gross additions to NPA stood at 69.5% as of 31-Dec-2013.

The Group’s NPA ratio ended December 2013 at 6.8% (4.6% excluding real-estate activity in Spain), a slight increase of 6 basis points over the last 3 months. This was due mainly to the aforementioned decline in lending activity in Spain. The NPA ratio of the banking business in the country stands at 6.4%, up 24 basis points over the quarter. The ratio in real-estate activity in Spain closed the quarter at 55.5% (55.3% as of 30-Sep-2013). In Eurasia, the NPA ratio closed December at 3.4% (2.9% as of 30-Sep-2013). In the United States and Mexico, this ratio improved over the quarter to 1.2% and 3.6%, respectively, as of 31-Dec-2013. Lastly, in South America, the NPA ratio remained stable and closed the year at 21% (2.2% as of 30-Sep-2013).

Lastly, coverage provisions for risks with customers totaled €15,715m as of 31-Dec-2013, practically the same figure registered at the end of September (€15,777m), bringing the Group’s coverage ratio to the same level reported at the close of the previous quarter, at 60%. By business areas, the ratio increased significantly in the United States, from 120% to 134%, in Mexico, to 110% (105% as of 30-Sep-2013) and in South America, to 141% (137% at the end of the third quarter of 2013). It has remained stable in Spain and Eurasia, at 41% and 87%, respectively, at the end of 2013 (41% and 91%, respectively, at the close of the third quarter of 2013). In real-estate activity in Spain it stands at 61% (62% at the end of September).

### Structural risks

The Assets and Liabilities Management unit in BBVA’s Financial Area is responsible for managing overall liquidity and structural interest-rate and foreign-exchange positions.

**Liquidity** management helps to finance the recurring growth of the banking business at suitable maturities and costs, using a wide range of instruments that provide access to a large number of alternative sources of finance. A core principle in the BBVA Group’s liquidity management is the financial independence of its subsidiaries abroad. This principle prevents the propagation of a liquidity crisis among the Group’s different areas and guarantees correct transmission of the cost of liquidity to the price formation process.

In the last three months of 2013, the situation in the wholesale financial markets was very similar to the previous quarter. The long-term wholesale financial markets in Europe were notably stable, as a result of the positive trend in sovereign risk premiums, as growth expectations improved in the euro zone. Against this background, BBVA has continued to have constant access to the market, although the liquidity contributed by the euro balance sheet has meant that no issuance was needed on the long-term wholesale markets.

Similarly, short-term finance in Europe has also performed well, in a context marked by a high level of market liquidity. Worth mentioning too is the outstanding performance of BBVA’s retail franchise in Spain, which managed to improve its liquidity gap again, as a result of its customer-centric focus and the Bank’s financial soundness.

The environment outside Europe has also been very positive. BBVA has once again strengthened its liquidity position in all the jurisdictions in which the Group operates. In the franchises where BBVA is present, its capacity to gather deposits has meant the absence of the need to access the international financial markets and also a further improvement in the Group’s financing structure.

(1) Excluding real-estate activity in Spain
To sum up, BBVA’s proactive policy in its liquidity management, the growth in customer funds in all geographical areas, its proven ability to access the market, even in difficult environments, its retail business model, the lower volume of maturities compared with its peers and the relatively small size of its balance sheet, all give it a comparative advantage against its peers. Moreover, the increased proportion of retail deposits continues to strengthen the Group’s liquidity position and to improve its financing structure.

**Foreign-exchange risk** management of BBVA’s long-term investments, basically stemming from its franchises abroad, aims to preserve the Group’s capital adequacy ratios and ensure the stability of its income statement.

In the last quarter of 2013, BBVA maintained a policy of actively hedging its investments in Mexico, Chile, Peru and the dollar area, at close to 50% in aggregate terms. In addition to this, corporate-level hedging, dollar positions are held at a local level by some of the subsidiary banks. The foreign-exchange risk of the earnings expected from abroad for 2013 is also strictly managed. The impact of variations in exchange rates in 2013 has been partly offset by the hedging positions held, which have counteracted a possibly more negative effect on the Group’s income statement and capital ratios. For 2014, the same prudent and proactive policy will be pursued in managing the Group’s foreign-exchange risk.

The unit also actively manages the **structural interest-rate exposure** on the Group’s balance sheet. This aims to maintain a steady growth in net interest income in the short and medium term, regardless of interest-rate fluctuations.

In 2013, the results of this management have been very satisfactory, with extremely limited risk strategies in Europe, the United States and Mexico. These strategies are managed both with hedging derivatives (caps, floors, swaps and FRAs) and with balance-sheet instruments (mainly government bonds with the highest credit and liquidity ratings).

### Economic capital

Attributable **economic risk capital** (ERC) consumption as of 31-Dec-2013 amounted to €30,034m, an 8.7% decline on the figure for September 2013.

As is to be expected from BBVA’s profile, the largest allocation to ERC (57.1%) relates to **credit** risk on portfolios originated in the Group’s branch network from its own customer base. A 5.1% decline was reported in the quarter, concentrated mainly in Spain.

**Equity** risk, in other words the portfolio of holdings in industrial and financial companies, the stake in the CNCB group and consumption of economic capital from goodwill, has reduced its proportion in relation to total risks to 18.4% as a result of the sale of 5.1% of the stake in CNCB.

**Structural** balance-sheet risk, originated from the management of both structural interest-rate risk and exchange-rate risk, accounts for 6.6% of ERC, and has declined 17.8% over the last quarter, also affected by the sale of the aforementioned stake in CNCB.

**Operational** risk remained stable, with a relative weight of 7.1%, while **fixed-asset** risk decreased by 5.2% and also accounts for 7.1% of total ERC consumption.

Lastly, **market** risk, which is of less importance given the nature of the business and BBVA’s policy of minimal proprietary trading, reduced its relative weight over the quarter to 2.6%.
The main trends observed in the global economy over the previous quarters were confirmed in the latter part of 2013. First, the recovery of the U.S. economy and the start of the gradual withdrawal of the extraordinary monetary stimuli by the Federal Reserve. Second, the European Central Bank’s (ECB) cut in its base rate to an all-time low, in order to support the economic recovery of the Eurozone. The improvement of the macroeconomic fundamentals in emerging markets and the fact that their exchange rates have on the whole been flexible, have led to an orderly adaptation to the Fed’s monetary policy transition.

Financial markets began the quarter facing the threat of a possible default by the U.S. Treasury, the exit by the Fed from its expansive monetary policy and the consequent value readjustment in emerging assets in international portfolios. Most of these uncertainties began to ease toward the end of 2013, as reflected in the gains of the main stock-market indices. The general European index, the Stoxx 50, posted a quarterly gain of 5.2% at the end of December. The Ibex 35 and the Eurozone bank index (Euro Stoxx Banks) rose by 8.0% and 12.4% respectively. Equity analysts consider that BBVA’s earnings in the third quarter of 2013 stand out from other Spanish banks due to the strength of its balance sheet and BBVA’s excellent capital position, as well as its more conservative risk management policy compared with the rest of the Spanish banking system.

As a result, most analysts continue to classify BBVA as the best investment option for taking advantage of the opportunities derived from Spain’s imminent economic recovery. The Group’s earnings in Mexico and South America have also been very positive, and in some cases have exceeded market expectations.

As a result of the above factors, the BBVA share gained significantly in 2013. At the end of December, the share price had risen over the quarter by 8.3% and by 28.6% over the previous 12 months, closing as of 31-Dec-2013 at €8.95 per share. This price represents a market capitalization of €51,773m, a price/book value ratio of 1.1, a P/E ratio of 23.2 (calculated on the BBVA Group’s net attributable profit for 2013) and a dividend yield of 4.1% (based on the new shareholder remuneration policy announced last October 25th, 2013).

Following the rise of the share price in the third quarter, the average daily volume traded from October to December fell 39.3% to 39 million shares, a 24.1% decline in terms of average daily volume, to €340m.

As regards shareholder remuneration, a new dividend policy has been announced that will pay shareholders in cash, in line with earnings and the Group’s growth profile. This shift toward a 100% cash remuneration will be accompanied by a complement to the cash dividend through the “dividend-option” system during the transition period. The market has taken a positive view of this new policy’s focus on cash payment, and considers that there are good grounds for implementing it in the current circumstances.

(Note: Calculated with the new shareholder remuneration policy announced on October 25th, 2013.)
Corporate responsibility

Respect for people’s dignity and their inherent rights is an essential requirement for BBVA. Since late 2012, the Bank has been a member of the “Thun Group of Banks”, a group set up with the aim of helping implement the “Guiding Principles on Business and Human Rights” in the banking sector. In 4Q13, an initial working paper was released, containing reflections on the value of principles for the financial business.

BBVA has also joined the “Global Initiative for Sustainability Ratings” (GISR). Its aim is to design a standard to accredit the sustainability ratings, indices and rankings found on the market and to step up the contribution made by companies and other organizations to sustainable development.

During the last quarter of 2013 there have also been other milestones in terms of corporate responsibility.

Financial inclusion

BBVA Colombia has announced an alliance with Grupo Gelsa to open 140 banking correspondents in the country. This will enable customers to carry out different transactions (deposits, payments, withdrawals, transfers, etc.) at the established service points.

The BBVA Microfinance Foundation has launched its new website, designed for those who want to learn about the work carried out by the Foundation, which to date has enabled 14 million people from underprivileged backgrounds to perform sustainable productive activities in Latin America.

Financial literacy

In Spain, the Instituto BBVA de Pensiones (BBVA Pensions Institute) has been set up and the Bank has launched the “Mi Jubilación” (“My Retirement”) initiative, that includes studies and educational contents about the pensions system to help the general public take rational and informed decisions.

BBVA Chile has set up the “Educación Financiera para Jóvenes” (“Financial Literacy for Young People”) and “Adelante con tu Futuro para Colegios” (“Forward with Your Future for Schools”) programs to help children and young people take informed financial decisions.

BBVA in the Sustainability Indices

BBVA has a prominent position in the main sustainability indices at international level. As of December 31, 2013, its weightings were as follows:

Further information and contact details are available at www.bancaparatodos.com
This section presents and analyzes the most relevant aspects of the Group’s different areas. Specifically, it shows the income statement, the balance sheet, the business activity and the most significant ratios in each of them: performing loans, customer funds (on and off-balance-sheet), efficiency ratio, NPA ratio, coverage ratio and risk premium.

In the first quarter of 2013 changes were made to the geographical reporting structure of the BBVA Group’s business areas. Consequently, banking activity in Spain includes the portfolios, finance and structural euro balance-sheet positions managed by ALCO that were previously reported in Corporate Activities. In addition, because of the particular nature of their management, the assets and results pertaining to the real-estate business in Spain are presented separately. This covers lending to real-estate developers (previously integrated in Spain) and foreclosed real-estate assets which were included in Corporate Activities in the years prior to 2013.

As a result, the composition of the business areas in 2013 is different from that presented in 2012, and is now as follows:

- **Banking activity in Spain** (from now on, Spain), which as in previous years includes: The Retail network, with the segments of individual customers, private banking, and small businesses; Corporate and Business Banking (CBB), which handles the SMEs, corporations and institutions in the country; Corporate & Investment Banking (CIB), which includes business with large corporations and multinational groups and the trading floor and distribution business in the same geographical area; and other units, among them BBVA Seguros and Asset Management (management of mutual and pension funds in Spain). In addition, starting in 2013 it also includes the portfolios, finance and structural interest-rate positions of the euro balance sheet.

- **Real-estate activity in Spain**. This new area has been set up with the aim of providing specialized and structured management of the assets of the real-estate area accumulated by the Group as a result of the crisis in Spain. Therefore, it mainly includes loans to real-estate developers (previously reported in Spain) and foreclosed real-estate assets (previously reported in Corporate Activities).

- **The United States** encompasses the Group’s businesses in the United States. The historical series in this area has been reconstructed to exclude the business in Puerto Rico, which was sold in December 2012, and include it in the Corporate Center.

- **Eurasia**, which as in 2012 includes the business carried out in the rest of Europe and Asia, i.e. the retail and wholesale businesses of the Group in the area. It also includes BBVA’s stakes in the Turkish bank Garanti and the Chinese banks CNCB and CIFH. The equity-accounted income of CNCB (excluding the dividends) has been reclassified from Eurasia to the Corporate Center under the heading ‘Results from corporate operations’.

- **Mexico**, which includes the banking and insurance businesses in the country (the pensions business was sold in the first quarter of 2013 and its earnings were registered in the Corporate Center under the heading ‘Results from corporate operations’.

- **South America** includes the banking and insurance businesses that BBVA carries out in the region. In the first half of 2013 it closed the sale of its stake in the pension fund administrators in Colombia and Peru, while in this last quarter it completed the sale of Provida Chile and BBVA Panama, whose earnings have been registered in the Corporate Center under the heading results from corporate operations.

In addition to the above, all the areas include a remainder made up of other businesses and of a supplement that includes deletions and allocations not assigned to the units making up the above areas.

Lastly, the **Corporate Center** is an aggregate that contains the rest of the items that have not been allocated to the business areas, as it basically corresponds to the Group’s holding function. It groups together the costs of the headquarters that have a corporate function; management of structural exchange-rate positions, carried out by the Financial Planning unit; specific issues of capital instruments to ensure adequate management of the Group’s global solvency; portfolios and their corresponding results, whose management is not linked to customer relations, such as industrial holdings; certain tax assets and liabilities; funds due to commitments with pensioners; goodwill and other intangibles. In addition, it also comprises the result from certain corporate operations carried out over the year, such as that from the pension business in Latin America, including the capital gains from the sale of the businesses in Mexico (first quarter), Colombia and Peru (second quarter) and Chile (fourth quarter), those resulting from the sale of BBVA Panama (fourth quarter), and the effect of the repricing of the stake in CNCB to market value following the signing in the fourth quarter of the new agreement with the CITIC group, that includes the sale of 51% of the stake in CNCB. It also includes the equity-accounted earnings from CNCB (excluding the dividends) for previous periods, in both 2013 and 2012. Lastly, the data for the previous year includes the financial statements of BBVA Puerto Rico until its sale, which was completed in December 2012.
In addition to this geographical breakdown, supplementary information is provided for all the wholesale businesses carried out by BBVA, i.e. Corporate & Investment Banking (CIB). This aggregate business is considered relevant to better understand the BBVA Group because of the characteristics of the customers served, the type of products offered and the risks assumed.

The figures corresponding to 2012 have been restated according to the same criteria and the same structure of areas as explained above in order to offer homogeneous year-on-year comparisons.

Lastly, as usual, in the case of the Americas and Eurasia (basically Garanti), the results of applying constant exchange rates are given in addition to the year-on-year variations at current exchange rates.

The Group compiles information by areas based on units at the same level, and all the accounting data related to the business managed are recorded in full. These basic units are then aggregated in accordance with the organizational structure established by the Group for higher-level units and, finally, the business areas themselves. Similarly, all the companies making up the Group are also assigned to the different units according to the geographical area of their activity.

Once the composition of each business area has been defined, certain management criteria are applied, of which the following are particularly important:

- **Capital.** Capital is allocated to each business according to economic risk capital (ERC) criteria. This is based on the concept of unexpected loss at a specific confidence level, depending on the Group’s capital adequacy targets. The calculation of the ERC combines credit risk, market risk, structural balance-sheet risk, equity positions, operational risk, fixed-asset risk and technical risks in the case of insurance companies. These calculations are carried out using internal models that have been defined following the guidelines and requirements established under the Basel II capital accord, with economic criteria prevailing over regulatory ones.

  ERC is risk-sensitive and thus linked to the management policies of the businesses themselves. It standardizes capital allocation between them in accordance with the risks incurred. In other words, it is calculated in a way that is standard and integrated for all kinds of risks and for each operation, balance or risk position, allowing its risk-adjusted return to be assessed and an aggregate to be calculated for profitability by client, product, segment, unit or business area.

  - **Internal transfer prices.** Within each geographical area, internal transfer rates are applied to calculate the net interest income of its businesses, under both the asset and liability headings. These rates are composed of a market rate that depends on the operation’s revision period, and a liquidity premium that aims to reflect the conditions and outlook for the financial markets in each area. Earnings are distributed across revenue-generating and distribution units (e.g., in asset management products) at market prices.

  - **Allocation of operating expenses.** Both direct and indirect costs are allocated to the business areas, except where there is no clearly defined relationship with the businesses, i.e. when they are of a clearly corporate or institutional nature for the Group as a whole.

  - **Cross-selling.** In some cases, consolidation adjustments are required to eliminate shadow accounting entries in the earnings of two or more units as a result of cross-selling incentives.

<sup>(1)</sup> Pro forma financial statements with Garanti Group accounted for by the proportional consolidation method, without early application of the IFRS 10, 11 and 12.
Spain highlights in the fourth quarter

- Another reduction in the loan-book balance.
- Improvement in entries to NPLs.
- High deposit renewal rates, over 80%.
- Good price management leading to improvement in net interest income.
- Exceptional payment to the Deposit Guarantee Fund (DGF).

Highlights

Lending activity in the quarter has continued to follow the downward trend seen in recent quarters, and this continues to have a negative impact on the NPA ratio. On the contrary, deposits have performed well. Both items have allowed the area to once again improve its commercial gap.

In 2013, earnings were strongly affected by the elimination of the so-called "floor clauses", the specific increase in loan-loss provisions due to the classification of refinanced loans, the accounting for the exceptional payment to the Deposit Guarantee Fund (DGF) in Spain in compliance with Royal Decree-Law 6/2013 and the capital gains generated by the reinsurance operation on the individual life and accident insurance portfolio.

Macro and industry trends

In the latter part of 2013, the Spanish economy began to emerge from its long period of recession. This still incipient recovery is underpinned by the positive performance of exports and a less contractive domestic demand. These factors are improving market confidence. As a result, there has been no major financial tension, significant declines in the sovereign risk premium, and the economy has opened up to international financial flows. Even so, the recovery is still very modest, particularly in terms of unemployment, which is still above 25% of the active population.

As far as the financial system is concerned, the weakest part of the sector has continued...
to be restructured and reorganized, and in late 2013 it was confirmed that the financial assistance program agreed with the Troika (European Commission, ECB and International Monetary Fund -IMF-) would be ended. In November, the IMF and the European Commission separately published the fourth monitoring report on the restructuring of the sector, highlighting the progress made in bank recapitalization and restructuring, and in reinforcing the system’s supervision and monitoring. Lastly, the financial sector has continued with its deleveraging process, although the flow of new credit transactions granted in recent months in Spain shows an improvement driven by the corporate portfolio. However, the outstanding balance of loans continues to decline, having a negative impact on the sector’s NPA ratio, which at the end of October 2013 amounted to 13% for the system as a whole. This figure has also been influenced by the classification of refinanced loans.

**Activity**

Against this background, performing loans in the area amounted to €165,813m as of 31-Dec-2013, implying a decline of 4.6% over the quarter and 10.2% over the last twelve months.

As stated above, in terms of asset quality, the upward trend in the NPA ratio continues, largely due to the declining lending volumes, as non-performing loans fell during the last quarter. In the year-on-year comparison, the rise in the NPA ratio is also due to the impact of the classification of refinanced loans made in the third quarter. As of 31-Dec-2013, this ratio stood at 6.4% (6.2% as of 30-Sep-2013). The coverage ratio has remained stable over the period, ending at 41%, as at the end of September.

However, from the standpoint of liabilities, the performance of customer funds continues being very positive. As of 31-Dec-2013, BBVA managed €190,508m in customer deposits, promissory notes, mutual and pension funds, which implies year-on-year growth of 11% and of 35% on the close of the previous quarter.

**Customer deposits under management** rose 2.8% since September 2013 and 10.4% over the last twelve months. Current accounts report the higher growth over the quarter (up 5.3%), while time deposits have grown largely due to the declining lending volumes, as non-performing loans fell during the last quarter. In the year-on-year comparison, the rise in the NPA ratio is also due to the impact of the classification of refinanced loans made in the third quarter. As of 31-Dec-2013, this ratio stood at 6.4% (6.2% as of 30-Sep-2013). The coverage ratio has remained stable over the period, ending at 41%, as at the end of September.

However, from the standpoint of liabilities, the performance of customer funds continues being very positive. As of 31-Dec-2013, BBVA managed €190,508m in customer deposits, promissory notes, mutual and pension funds, which implies year-on-year growth of 11% and of 35% on the close of the previous quarter.

(1) Excluding repos. Including promissory notes sold by the retail network and collection accounts.
In off-balance-sheet funds, BBVA has performed well in both mutual and pension funds, which increased by 8.8% and 2.8%, respectively, during the quarter, and by 16.6% and 10.0%, respectively, over the year. In an environment of very low interest rates, BBVA is actively selling a diversified mutual fund catalog to customers with the right investor profile. As a result, BBVA has maintained its position as the top manager in both mutual and pension funds in Spain, with market shares of 16.4% in mutual funds (according to the latest information available as of November) and 20.4% in pensions (according to data published by Inverco in September).

**Earnings**

Earnings for the BBVA banking business in Spain in 2013 have been influenced by four exceptional factors. First, the elimination in May 9 of the so-called “floor clauses” from mortgage loans signed by consumers. Second, the temporary increase in loan-loss provisions as a result of the classification of refinanced loans in the third quarter. Third, the exceptional payment to the Deposit Guarantee Fund (DGF) booked in the fourth quarter, in order to comply with Royal Decree-Law 6/2013. Lastly, the capital gains generated in the first quarter by the reinsurance operation on the individual life and accident insurance portfolio.

The area’s gross income totaled €6,095m in 2013 (down 8.5% year-on-year). At €3,830m, net interest income declined 19.3% year-on-year due to the elimination of mortgage floors clauses, weaker lending activity and the current setting of low interest rates, and thus narrow spreads. However, there has been improvement over the quarter (up 7.4%) thanks to adequate price management in new lending operations and, above all, in renewals of liabilities, which will lay the foundations for recovery of net interest income in the coming years. Income from fees and commissions is up 2.5% during the same period to €1,376m, thanks to the positive performance of fees from fund management and wholesale banking transactions with clients. Lastly, the positive performance of the Markets unit and good management of structural risks on the balance sheet against a background of low interest rates have had a positive impact on NTI generation in 2013, with strong performance offsetting the decline in the 'Other income and expenses' heading due to the one-off insurance operation done in early 2013 and the exceptional payment made to the Deposit Guarantee Fund in the fourth quarter.

Operating expenses remain under control and show a substantial slowdown in their year-on-year rate of change. For the year as a whole, this heading amounts to €3,014m, up 4.4% on 2012, the year Unnim was incorporated (late July). Consequently, operating income for the year totals €3,081m, compared to €3,778m in 2012.

Impairment losses on financial assets in the quarter have the lowest figure for the year, markedly lower than in the previous quarter, which included an additional charge due to the classification of refinanced loans. For the year as a whole, this heading amounts to €2,577m, up 39.1% year-on-year due to the aforementioned additional charge.

Lastly, the ‘Results from corporate operations’ heading includes the capital gain from the reinsurance operation carried out in the first quarter of the year. All considered, banking activity in Spain generated a net attributable profit of €583m in 2013.

**Main highlights**

Against the background of restructuring, BBVA’s strategy in Spain remains focused on strengthening the franchise through growing the customer base and gaining market share. In order to achieve these targets, the retail banking business remains committed to savings and lending products as the main drivers for increasing customer fund gathering and bundling.

On the assets side, one of the quarter’s highlights was the launch of “Préstamo Inmediato” (“Immediate Loan”), a pre-approved loan that can be contracted through any channel, for a customized amount and price based on a behavioral analysis of each customer.

In insurance, BBVA continues to redefine certain products in order to tailor them to customer needs, and to make them more simple and competitive. BBVA has launched “Seguro de Vivienda BBVA” (“BBVA Home Insurance”), a modular, flexible...
and competitive product that enables customers to contract what they really need, depending on the features of their home.

BBVA continues to play an active role in developing products and services for the **Premium segment**. In order to improve customer experience in this area, relationships with the bank agent by scheduled appointments are being encouraged, which enables the bank to save a significant amount of time, and to offer greater dedication and better advice.

Progress has also continued to be made in the **multi-channel strategy**, with a firm commitment to innovation and digital channels, in order to bring the financial products and services to customers no matter where they may be:

- The “BBVA Contigo” remote management model has been consolidated. According to 2013 year-end figures, over half a million customers are using this service.

- In digital channels, a new website has been launched for the youth segment: bluebbva.com.

- Mobility is another priority in multi-channel distribution. Also worth noting is the launch of “BBVA Wallet”, which enables customers to perform transactions with their cards using their cell phones and make payments through contactless technology. Since its launch and in just two weeks, the app has been downloaded 20,000 times, and this is on top of the 2 million active users in digital channels.

The **CBB** unit has been very focused on retaining and gathering deposits, as a way of consolidating and increasing customer loyalty. BBVA has also set itself the target of meeting solvent demand for credit in a proactive way. This goal has been achieved through the “Plan +Negocio” (“+Business Plan”), based on increased management, proximity and analysis of projects of customers and non-customers with proven solvency. In addition, BBVA has confirmed its leading role in distributing ICO (Official Credit Institute) credit facilities, which are a way of measuring lending activity in this unit. Using cumulative data through 31-Dec-2013, the Bank had arranged 24,257 transactions for €1,743m, 21% higher than the amount contracted as of the same date in 2012.

The following **prizes and awards** are worth mentioning in the quarter:

- In November, BBVA was awarded with the “Impulso al Autónomo” (“Promoting Self-Employed Workers”) prize, organized by the Federación Nacional de Trabajadores Autónomos (National Federation of Self-Employed Workers, ATA) and the Joly group, for the “Yo Soy Empleo” (“I am employment”) program. This award underlines the Bank’s commitment to helping create jobs for self-employed workers and SMEs.

- For the fourth year in a row, BBVA Banca Privada has been chosen as the “Best Private Bank in Spain” in the 2013 “The Global Private Banking Awards”, granted every year by The Banker, the prestigious Financial Times Group journal specializing in international banking. This award is a further recognition of BBVA’s business model, based on customized advice and a comprehensive management service that combines trust and transparency.

- Lastly, BBVA has been chosen as “Mejor Banco en Redes Sociales en España” (“Best Bank in Social Networks in Spain”) in 2013. According to Alianzo, the on-line analysis company, the keys to BBVA’s success are the interesting and useful contents posted for its stakeholders, highlighting the dissemination of advice on how to better manage home economics and the promotion of sports sponsorships and of the BBVA brand.
Real-estate activity in Spain

### Highlights

#### Activity in the fourth quarter of 2013 does not differ significantly from previous periods. The most relevant aspects were once more the reduction of exposure to developer loans and the good rate of property sales.

#### The area's income statement basically includes the expected loan-loss provisions for lending to the developer sector, the effect of property sales and the repricing of foreclosed assets to market value, as well as the expenses associated with the specialized and orderly management of these assets.

#### Highlights

- The improved economic climate has started to be reflected in the stabilization of sales and prices in the sector.
- Another reduction in BBVA's net exposure to the real-estate sector.
- Increased rate of growth in sales of real-estate assets.
- Limited risks.

#### Industry trends

The slight improvement in the economic climate in the fourth quarter of the year has begun to be reflected in the real-estate sector. Despite its fragility, it is showing indications of stabilization in terms of prices and sales, particularly in the markets that are most attractive to foreign investors. The fall in construction activity is also slowly reducing the excess stock, and with it the pressure on prices.

Financial conditions remain attractive in the mortgage market, with interest rates and affordability ratios at all-time lows. However, lack of liquidity is still a clear obstacle to the full development of residential demand. Forecasts point to an improvement in both sales and prices in 2014.

Exposure

The Group faces two very different realities within the real-estate sector: the first is its net exposure to the developer segment (lending to developers plus the foreclosed assets resulting from this lending), which is still falling and will continue to do so in the future; the other is the retail foreclosures, i.e. the assets from the mortgage loans to private individuals. Their increase is linked to the rise in gross additions to NPA in this portfolio in 2008 and 2009.

After complying with the requirements imposed by Royal Decree-Laws 2/2012 and 18/2012 in 2012, BBVAs net exposure to the real-estate sector in Spain is declining. As of 31-Dec-2013, the balance stood at €14,570m, 15% down on the close of the previous quarter and 6.5% below the figure at the close of 2012.

In 2013 there was an increase in the balance of non-performing developer loans, basically due to the application of the classification of refinanced loans in the third quarter. In fact, a significant percentage of the volume of loans reclassified as non-performing as a result of this classification corresponds to customers who are currently up-to-date with their payments.

Within the exposure to the Spanish real-estate sector, property securing mortgage loans to private individuals has increased year-on-year by 14.6%. As has been noted, this rise is closely linked to the increase in gross additions to NPA in this mortgage portfolio during 2008 and 2009.

At the close of 2013, the Groups coverage of non-performing and substandard loans (51%) and of assets from foreclosures and purchases (51%) remained stable compared with the levels of the previous quarter. Overall coverage of real-estate exposure closed the year at 45%, the same level as that reported at the end of September.

In the latter part of 2013, sales of owned real-estate assets picked up pace, at 4,643 units over the quarter, a rise of 48.3% on the previous quarter. If third party sales are added, the total units sold amount to 8,485. In the year as a whole, cumulative sales totaled 21,383 units, of which 6,593 correspond to third parties.

Earnings

There are two significant elements in the income statement for the area first, the impact of loan-loss provisions in the developer book and the decline in the value of foreclosed real-estate assets; and second, the effect of the sale of properties.

Other factors influencing the situation, although to a lesser extent, are: the consolidation by the equity method of the stake in Metrovacesa, which is registered under the Other income/ expenses heading; the positive results from portfolio sales of stakes in associated companies, income from rentals; and the year-on-year increase in operating expenses, due to greater

(1) Transparency on like-for-like basis; the figures include Unim and exclude the investment in Metrovacesa.
(2) Other foreclosed assets include foreclosed assets that do not stem from financing family home buying.

staff numbers assigned to the area to carry out separate and specialized management of this business and deal with increased activity.

In 2013, BBVAs real-estate activity in Spain registered a loss of €1,254m, notably less than the loss of €4,044m the previous year, when there was an increase in impairment losses on financial assets and other negative results coming from the deterioration in assets related to this industry.

### The United States highlights in the fourth quarter
- Very favorable quarter in all credit portfolios and in lower-cost deposits.
- Excellent risk indicators.
- Slight increase in net interest income.
- Cost control.

### Highlights

**Business activity** in the area was very positive in all the credit portfolios and in lower-cost customer deposits, such as current and savings accounts. Asset quality indicators also improved.

In terms of quarterly earnings, net interest income improved slightly due to the effect of increased volumes, which is beginning to offset the negative impact of the scenario of low interest rates.

### Macro and industry trends

The most recent activity data confirm the recovery of the U.S. economy. GDP grew by around 1% in the third quarter and the latest available figures show that the expansion continued at a similar pace in the fourth quarter. Worth noting is the increase in private consumption and residential lending, while there was moderate growth in job creation and a gradual reduction in the unemployment rate. Against this background, the Fed has confirmed that it will start to scale back its expansive monetary policy beginning in early 2014 (the process known as “tapering”). Lastly, on the fiscal front, the political parties have reached an agreement to reduce the fiscal drain expected for 2014 and, thus, the possibility of another government shutdown.

As for exchange rates, the dollar continued to depreciate against the euro in the last quarter, which had a negative impact on the changes in the Group’s financial statements, both over the quarter and in the year as a whole. To better understand the evolution of

(1) At constant exchange rate.
the business figures, the percentages given below refer to constant exchange rates, unless otherwise indicated.

The last quarter’s figures have confirmed the improvement in the country’s banking system seen throughout the year, with a positive trend in both profits and the sector’s NPA ratio (0.8% at the close of September for commercial banks, compared with 4.7% at the end of 2012). This improvement in bank earnings continues to be supported by higher non-financial revenue (the low interest rates are still having a negative effect on net interest income) and reduced needs for provisions due to the improvement of asset quality across all the portfolios. Lastly, the rate of growth of domestic deposits picked up in the second half of the year.

Activity

As of 31-Dec-2013 the area’s performing loans totaled €39,272m, rising again by 2.3% in the quarter and by 9.4% over the year. This increase was widespread across all of the Bank’s portfolios. Lending to corporates (commercial) increased by 3.4% over the quarter and 14.7% since the end of 2012, while residential mortgages (residential real estate) grew by 2.1% and 10.1%, respectively over the same period. There was also an increase in consumer loans (up 14% in the quarter and 5.9% over the year) and a recovery in the construction real estate portfolio (up 4.6% in the quarter, but down 4.6% compared to the figure for December 2012), after several quarters of falling balances.

The main indicators of the area’s asset quality and risk management improved significantly in the quarter, with the NPA ratio down 22 basis points to 1.2% and the coverage ratio up 14 percentage points to 134%.

Customer deposits under management

at €38,448m as of December 31, 2013, also increased significantly over the quarter, by 4.3% (up 6.5% on the figure as of 31-Dec-2012). These positive figures are due to the favorable performance of lower-cost deposits, specifically current and savings accounts, which are up 34% since the close of September 2013 and 7.2% since the end of December 2012. In contrast, time deposits remained practically stable in the quarter and are down 3.2% for the year as a whole.

Earnings

The area’s earnings in 2013 were strongly influenced by the impact of the current environment of low interest rates on revenue, the control of operating expenses and the increase in loan-loss provisions, very much in line with the upward trend seen in business performance of lower-cost deposits, specifically current and savings accounts, which are up 34% since the close of September 2013 and 7.2% since the end of December 2012. In contrast, time deposits remained practically stable in the quarter and are down 3.2% for the year as a whole.

</table>
activity. As a result, the area generated a net attributable profit of €390m in 2013 (down 8.8% year-on-year), of which 86% came from BBVA Compass.

As mentioned above, the performance of revenue in 2013 was strongly affected by the scenario of low interest rates. This impact has offset the positive effect of the improvement of activity in the year. As a result, net interest income declined by 6.2% over the year to €1,407m. However, this trend began to revert and in the last quarter net interest income registered an improvement of 21% on the third quarter of 2013. Income from fees and commissions, at €557m, remained practically flat in 2013 (down 0.8%), influenced by regulatory changes and the sale of the insurance business in 2012. NTI is down 5.4% over the same period, while the other income/expenses shows a less negative amount. As a result, the area’s gross income stands at €2,101m, down 31% year-on-year.

The area continues to manage its operating expenses efficiently by applying a strict cost control policy. As a result, this heading totaled €1,475m in 2013, with a year-on-year increase of 1.3%. Overall, operating income generated in the year was €627m, 12.1% less than in 2012, strongly influenced by the performance of net interest income.

Lastly, impairment losses on financial assets detracted €78m from the 2013 income statement and increased by 12.7% due, above all, to the absence of recoveries and atypical items (unlike in 2012). Excluding these effects, this heading grew in line with business activity.

### Main highlights

After the implementation of a new technology system the previous year, 2013 was marked by significant progress in the new products and services offered by BBVA Compass. By moving from a product-focused to a customer-centric bank, the catalog has been designed to provide customers with simple solutions and user-friendly distribution channels. Four new current accounts were
launched in the fourth quarter of 2013: “ClearConnect Checking”, “ClearChoice Checking”, “ClearChoice Checking for Seniors” and “ClearChoice Checking for Everyday Heroes”. They are all part of a complete redesign of this product, aimed at offering simple and transparent banking options to customers. Shortly after their launch, BBVA Compass announced a premium current account and three new savings options. As with the aforementioned accounts, these products, “ClearChoice Premium Checking”, “ClearChoice Money Market”, “ClearConnect Savings” and “ClearChoice Savings”, have been designed taking into account customers’ specific banking habits.

As regards organic growth, BBVA Compass continues to be focused on expanding into new markets in order to provide services to corporates and wealth management services. A new office was opened in the fourth quarter in Cleveland (Ohio) in order to originate and fund loans. In retail banking, BBVA Compass has developed a plan and started testing a new high-tech design for traditional branches. The first branch prototype is already in operation in Houston and construction of a second one in San Antonio began during the quarter. It is expected to be completed in the first half of 2014. The new design is a smaller branch, but with better use of the available space, and featuring technologies such as touchscreens and virtual managers.

In brand recognition, a new advertising campaign was launched to promote the brand in the United States, called “The Anywhere Banking”, which has been designed to showcase the bank’s range of operations with distinguishing features that combine simplicity with flawless execution.

Lastly, the year’s highlights in awards and recognitions were:

- The “Celent Model Bank Award” for the entity’s banking transformation, which has been praised in the specialized press as a “radical change”, and by Celent, which recognized that the use of technology has a clear and sustainable impact on the bank’s business, increasing sales, reducing risk, improving the processes and performance, and meeting market demands. The new technological platform is being used at all of the bank’s branches and represents one of the first successful replacements of basic infrastructure undertaken by a major U.S. bank in over a decade.

- American Banker has chosen the BBVA Compass mobile banking app as one of the 10 most advanced banking applications in terms of its functions, design and ease of use.

- BBVA Compass was the winner of the 2013 Best in Mobile Functionality Award at the 6th annual Mobile Banking Financial Institution awards of Javelin Strategy & Research. Javelin’s scorecard compares the 25 top retail financial institutions in the U.S. in six key areas: mobile banking functionality, mobile banking accessibility, mobile banking tablet ratings, mobile banking smartphone ratings, text banking, and alert platforms. The award recognizes the range that the bank offers in mobile banking, which is one of the most comprehensive on the market.

\(^{(1)}\) Pro forma financial statements with Garanti Group accounted for by the proportional consolidation method, without early application of the IFRS 10, 11 and 12.

\(^{(2)}\) At constant exchange rates.

#### Eurasia highlights in the fourth quarter

- Customer lending at very similar levels to those reported at the end of 2012.
- Excellent performance of customer funds, both retail and wholesale.
- In Turkey, impacts stemming from the depreciation of the Turkish lira and interest-rate movements.
- Slight deterioration of the risk indicators.
- Signing of a new agreement with the CITIC group.

#### Highlights

*In activity*, the same trends mentioned throughout the year have been maintained in the fourth quarter of 2013. In performing loans, Garanti’s retail business has continued to perform well, while the wholesale banking business remains much more contained. The trend in customer funds has continued to be favorable, due both to strong activity in the retail segments and the recovery of the balances from wholesale banking customers, which already show positive rates of growth in the quarter and over the year.

#### Earnings

In the quarter improved compared to the previous quarter, thanks to the greater contribution by the Markets unit, which has offset the effect of interest and exchange-rate movements on Garanti’s figures over the last two quarters. Indeed, between October and December, the Turkish lira has continued to depreciate against the euro, which has had a negative impact on the performance of the area's financial statements, both in the quarter and over the year.

#### Macro and industry trends

The macroeconomic situation in Europe has continued to improve throughout the quarter, although still at a slow pace and with some variance across the countries. Against this background, and given the environment of low inflation, the ECB has cut interest rates to all-time lows in order to speed up the recovery.
With respect to its financial system, the political leaders have continued to make progress toward the banking union. On October 23, the ECB released information on the comprehensive assessment process of the balance sheets of the nearly 130 banks it will supervise in the second half of 2014. The results of this process will be of great importance in allaying doubts about the solvency of the European banking system, recovering investor confidence and quantifying the problems inherited from the crisis, which will have to be resolved at national level.

In Turkey, economic activity has remained strong, despite the adverse factors in the quarter. The macro scenario has been affected by renewed volatility in the financial markets, influenced by the Fed’s withdrawal of the monetary stimuli. In addition, there was further uncertainty in the internal political landscape. As a result, the yield on the Turkish 10-year bond has once again exceeded the 10% mark, which has made the average cost of funding for the system significantly more expensive but has not prevented the Turkish lira from depreciating further. Against this background, both the government and the Central Bank of Turkey (CBT) have adopted a policy aimed at encouraging saving and stimulating the industrial sector through a series of measures designed to slow down the growth of consumer finance and promote funding for SMEs and exports.

In this context, the Turkish financial sector maintains sound levels of capitalization and a high level of profitability, although the recent toughening of monetary policy measures and the interest rate movements are putting downward pressure on the margins of banking institutions. In recent months, the year-on-year rate of growth of lending seems to be slowing down, although it remains at levels above 20%. Gathering of customer funds continues to improve, but at a slower pace than lending. Lastly, the sector’s asset quality does not seem to be worsening and the NPA ratio remains stable.

In China, the latest available figures confirm a recovery in the rate of GDP growth (up 78% year-on-year in the third quarter). Worth mentioning in the quarter was the audit conducted on local financial institutions, as well as the plans announced by the Communist Party at its last plenary session to liberalize interest rates, open the country up to foreign banks and introduce a deposit guarantee scheme. The strong growth in lending has continued in recent months, despite the government’s efforts to limit the risks of high debt, which has led to moments of liquidity tension in the interbank market. There has also been a moderate upturn in the NPA ratio, particularly in small and medium-sized banks, in which small companies have a greater weight (and which are therefore more vulnerable to a less favorable economic environment).

Lastly, and in order to provide a better understanding of trends in business and earnings in the area, the figures below on percentage changes refer to constant exchange rates, unless indicated otherwise.

**Activity**

In the aforementioned context, the area’s balance of performing loans as of 31-Dec-2013 declined over the quarter by 2.3%, so the amount under this heading is very similar to the close of the preceding year, €27,505m (up 0.9% year-on-year). This is due to the deleveraging process underway among the customers of the wholesale banking business in the region, since retail activity continues to perform well. Worth noting is the strong performance of Garanti Bank’s portfolios, particularly those of lira-denominated loans, which are up 276% in year-on-year terms. There has also been an improvement in the foreign-currency portfolio, geared to project finance (up 9.9% year-on-year).

As regards the area’s asset quality, there has been a slight upward movement in the NPA ratio in the quarter (from 2.9% as of 30-Sep-2013 to 3.4% as of 31-Dec-2013) due to the default of some one-off operations with wholesale customers in Garanti Bank (its NPA ratio increased from 2.0% in September to 2.1% at the close of December). The area’s coverage ratio closed the year at 87% (91% as of September 2013).

Customer deposits under management closed the year at €16,475m, up 12.6% on the figure at the end of 2012. Noteworthy is the increase in the balances of wholesale banking customers, which were up 9.3% over the year, and in the retail business, which registered year-on-year growth rates of 13.6%. In customer funds, Garanti Bank’s local-currency deposits have performed well (up 20.6% year-on-year), well above the sector average (up 14.6%), which has resulted in a year-on-year increase in market share of around 50 basis points, according to the latest information available as of 31-Dec-2013. The year-on-year increase in foreign-currency deposits has been 35%.

**Earnings**

With the aim of providing a better understanding of the area’s recurrent business, the results in the fourth quarter from the mark to market valuation of BBVA’s current stake in CNCB and the income by the equity method (excluding dividends) for previous periods, in both 2013 and 2012, have been classified as results from corporate operations within the Corporate Center.

Apart from the foregoing and the already noted negative impact of exchange rates, the most significant aspects of Eurasia’s income statement for 2013 are as follows:

- In the fourth quarter of the year, net interest income continued to be negatively affected by interest-rate movements in Turkey and their impact on customers’ spreads in Garanti. This is
despite the slight improvement seen in the last weeks of the year, due to better performance in new loan origination and the easing of the increase in deposit costs. Nevertheless, the area’s net interest income increased by 14.7% compared to the figure for the same period in 2012, to €911m.

- Income from fees and commissions stands at €391m, down 10.1% over the year, influenced by lower revenue from wholesale banking customers. This heading has improved steadily throughout the year due to the more positive performance of Garanti, especially in those headings most closely related to business activities with its customers.

- A good performance by NTI, which totals €194m in 2013, up 54.2% on the amount for 2012, thanks to the excellent performance of the area’s Global Markets unit.

- As a result of the above, gross income in Eurasia stands at €1,721m in 2013, up 8.6% year-on-year.

- Operating expenses continue to be held in check. They declined 1.4% over the last twelve months to €733m, despite the effect of the expansion plans implemented by Garanti during the year. In fact, since the close of 2012, the Turkish bank’s branch network has increased by 65 and the number of ATMs by 495; the costs resulting from the launch of i-Garanti before the summer should also be taken into account.

- Overall, Eurasia generated a net attributable profit in 2013 of €454m, up 20.7% on 2012. Of these, €267m (58.9%) come from Garanti’s contribution.

Main highlights

International investor confidence in Garanti, as one of the leading financial institutions in Turkey, has once again been manifested with the renewal, at a lower cost, and extension of the syndicated loan with 35 banks signed in 2012.

Several products launched by Garanti have been given awards during the year. Garanti’s subsidy search tool, which provides assistance and information to SMEs on subsidies available, received the “Best Customer Focus” prize at the British Best Business Awards. In addition, “Esparacard”, Garanti’s contactless payment card, was awarded with the “Best use of contactless/NFC technology” prize in the “Transportation and Ticketing” category at the Contactless and Mobile Awards 2013 sponsored by VISA and held in London.

In the area of corporate responsibility, Garanti’s policy has been focused on two issues: the role of women in the business world, and providing improved accessibility for the disabled. In 2013, more than 240 women graduated from the “Women Entrepreneur Executive School”, which will be extended to new cities in 2014. In addition, Garanti has adapted over 100 ATMs and 30 branches to provide improved access for the disabled. In education, and in partnership with Unicef, conditions have been improved at 4 schools in Istanbul and Ankara to reach international primary education standards.

### Mexico highlights in the fourth quarter

- **Bouyant activity.**
- **Very favorable performance of the more recurring revenue.**
- **Good management of customer spreads.**
- **BBVA Bancomer, one of the most efficient banks in the Mexican financial system.**
- **Improvement in risk indicators.**

### Highlights

For BBVA’s operations in Mexico, 2013 has been marked by the positive performance in recurring revenue, underpinned by the steadily increasing pace of business activity throughout the year. This increase is partly supported by the “Investment Plan” to which the area is fully committed, and which accounts for a significant part of the increased expenses over the year. Also of importance is the stability in asset quality indicators, which actually improved in the fourth quarter.

### Macro and industry trends

In the first half of 2013, the Mexican economy experienced a sharp slowdown (including a fall in GDP in the second quarter). This was gradually corrected over the rest of the year, and by the end of 2013 there were signs of recovery, especially in the manufacturing sector, which was buoyed up by higher foreign demand. Moreover, inflation, despite the upturn registered in the fourth quarter has remained under control, particularly its core component. This has allowed the Central Bank of Mexico (Banxico) to make a further cut in interest rates in the second half of the year to fuel growth.

Against this background, the exchange rate of the Mexican peso against the euro depreciated again during the last 3 months of 2013, although to a lesser degree than in the previous quarter. This exchange-rate pattern has a negative impact on the comparison of the balance sheet and activity of the area, both in the quarter and 2013 as a whole. In earnings, the effect is also negative over the last 3
months, but practically neutral over the year. As in previous reports, all the comments that refer to exchange rates will be expressed at constant rates, unless expressly stated otherwise.

With regard to the banking sector, on November 22, Banxico published its report about the Mexican banking system, highlighting its strength, high level of solvency and return, but also lower rate of growth. The lagging growth in the first part of 2013 prompted a slowdown in credit growth (101% year-on-year as of November 2013, compared with 130% on the same date the previous year, according to figures by the National Banking and Securities Market Commission –CNBV–), and an upturn in the NPA ratio, largely among companies in the residential construction sector and in certain consumer finance segments.

Activity

There has been an upturn in BBVA’s commercial activity in Mexico during 2013, despite the slower growth in GDP. Thus performing loans have risen in the latter part of the year, and at 2013 year end stood at €38.678m, 9.8% higher than at the close of 2012 and 50% higher than the figure at the end of the preceding quarter.

The biggest growth in the last quarter was posted by the wholesale portfolio, at 14.7% year-on-year. Outstanding in this portfolio is the increase in financing to medium-sized enterprises (up 20.2%). Corporate lending also performed well. In addition, the area has played an active role in placing its customers’ shares and fixed-income instruments. As a result, BBVA has maintained its leading position in the Mexican capital market, with a market share of 15% in local issuance, according to cumulative data through December 2013 from the Mexican Stock Exchange (BMV). As a result, it has been named the “Best Investment Bank in Mexico”, by Latin Finance magazine. Lastly, there has also been a marked recovery in lending to government bodies over the last two quarters, with growth of 5.3% year-on-year.

The retail credit segments reported growth of 6.7% over the year, with financing to small

businesses particularly strong, with a year-on-year increase of 219%. The Bank has launched the new “Red PyME” (SME Network) in this segment, which has extended the specialized business centers to cover the whole of Mexico. This new service model includes commercial alliances to drive lending and, using the BBVA Group’s customer-centric approach, offer customers products which best fit their needs. Within the consumer portfolio, the successful pre-approved loans campaign has significantly boosted lending in the second half of the year. The year 2013 closed with a rise of 15.3% on the previous year’s balance and a rise in market share of over 150 basis points since June 2013, according to the latest information available from the CNBV as of November 2013.

The area’s asset quality indicators have also been positive, and improved in the last quarter of the year. At year end, the NPA ratio was 3.6% (41% at end of September 2013) and the coverage ratio increased to 110% (compared with 105% as of 30-9-2013).

Customer funds, which include demand deposits, time deposits, repos, mutual funds and other off-balance-sheet funds, totaled €60,489m at the end of 2013, with a year-on-year rise of 5.5%. The amount has been determined by the area’s policy in 2013 of increasing the profitability of liabilities. As a result, BBVA in Mexico has an adequate fund mix, with a higher relative weight of demand deposits, which have performed well with growth of 10.6% over the year.

Lastly, the insurance business has continued to perform well, with a positive impact on earnings in the area. Seguros BBVA Bancomer is still ranked as the second largest insurer in Mexico in terms of written premiums within the bancassurance market, and is ranked sixth in terms of the insurance market as a whole. Profits in this unit amounted to €291m, 6.5% up compared with the previous year.

Earnings

At the end of 2013, BBVA in Mexico reported a net attributable profit of €1805m, a year-on-year growth of 7.2%. Some of the most important factors accounting for this business performance are given below:

Cumulative net interest income amounts to €4,484m, up 77% year-on-year, on the back of higher lending and deposit volumes and good management of customer spreads. This performance in net interest income by BBVA Bancomer compares positively with that of its most important peers. In fact its net interest income over ATA (according to local accounting data) was 5.6%, more than 30 basis points above the market average, according to CNBV at the close of November 2013. Income from fees and commissions was up 10.7% over the year, boosted by more credit card transactions and increased revenue from the bank’s participation in market issuance by its corporate customers. It was a positive year for NTI, albeit more moderate than in 2012 (down 4.3%). Lastly, the other income/expenses heading, which basically includes revenue from the insurance business, has increased by 13.7% during the year. As a result, gross income amounted to €6,201m, an increase of 8.1% on the figure for the same period in 2012.

Operating expenses rose 8.2% in 2013 to €2,335m. This increase is largely the result of the implementation of the area’s “Investment Plan” aimed at remodeling the branch network, launching investment projects in technology and constructing new corporate headquarters, as well as developing other strategies to boost commercial activity. Despite this, the efficiency ratio is virtually unchanged (37.7% compared with 37.6% in 2012), making the bank one of the most efficient in the Mexican banking sector. These income and expenses figures have resulted in operating income ending the year at €3,865m euros, up 8.0% on the 2012 figure.

Lastly, impairment losses on financial assets stood at €1,439m, an increase of 9.4%, very much in line with the growth in activity over the year. BBVA’s cumulative risk premium in Mexico is at a very similar level to that of previous quarters: 357%.

Main highlights

The main highlights in the fourth quarter of 2013 for BBVA in Mexico are summed up below:

- Implementation of the “Experiencia Única” (Unique Experience) initiative to transform the business model by standardizing the customer service protocols to improve the procedure within branches and the quality of service. This program was installed in nearly 1,300 branches in 2013, amounting to 70% of the total BBVA Bancomer branch network.

- BBVA Bancomer has launched a new family of mutual funds on the market, called “Fondos Vida+”, targeted at companies with employee pension funds. This has allowed BBVA Bancomer to consolidate its position as the institution with the greatest cover and variety of mutual funds, broadening its range of pension cover with these four new types.

- BBVA in Mexico has created “Consumer Finance México”, aimed at reinforcing the franchise’s leadership in vehicle financing. This unit will give the bank an innovative strategy for financing vehicle distribution and acquisition, which will cover the needs of both auto dealers and end customers.

- With regard to prizes and awards, the investment bank JP Morgan has awarded BBVA Bancomer with the “Quality Recognition Award” for its international transfers, where it achieved an accuracy rate of 99.54% in deliveries. This award underlines the efficiency and customer-centric approach of BBVA Bancomer. It is also the only Latin American bank to receive this award for the tenth year in a row.

- BBVA has been chosen as one of the “Best Companies to Work for” in Latin America by the international consultancy Great Place To Work, in the multinationals category. In Mexico, the award has been granted to BBVA Bancomer, Seguros Bancomer and Multiasistencia.
South America highlights in the fourth quarter

- Year-on-year growth in activity above that of previous quarters.
- Strength of more recurring revenue.
- Stable risk indicators.
- Closing of the sale of BBVA Panama and AFP Provida in Chile.

Highlights

In the fourth quarter of 2013, business activity in South America has continued its trend of strong growth in both lending and, in particular, customer funds, closing the year with year-on-year growth rates higher than in previous quarters. This positive performance has taken place without any deterioration in the asset quality indicators.

In earnings of particular note are: the outstanding growth in more recurring revenue, the effect of growth and expansion plans in the region on expenses and a greater volume of loan-loss provisions due largely to the strength of business activity.

Macro and industry trends

In South America, the economic growth of most of the countries in the region (except for Brazil) has actually been slightly better than expected, despite the steady deterioration of the external backdrop, given the continued high commodity prices and moderation in financial tension toward the end of the year. Both consumption and investment have been supported by the strength of the labor markets and by monetary policies that are still expansive.

The financial system in most countries in South America remains sound. Lending continues to grow at a fast pace (though the trend is declining in some countries), boosted by economic policies focused on encouraging domestic activity and by the structural changes undertaken in recent years, which are underpinning sustainable growth in most

of the region. As a result, the financial systems in the area have high rates of profitability with NPA ratios held in check.

There has been a general depreciation against the euro in both the final and average exchange rates of the different currencies over the quarter. As a result, the impact of currencies on the year-on-year changes in the Group’s financial statements is negative for the quarter and for the whole of the year (particularly due to the devaluation of the Venezuelan bolivar at the start of 2013). Unless indicated otherwise, all comments below on percentage changes refer to constant exchange rates (1).

Activity

At the close of 2013, activity in South America was once more buoyant in practically all the countries where BBVA operates, both on the side of the loan book and in on-balance sheet customer funds.

The balance of performing loans as of 31-Dec-2013 closed at €47,753m, a year-on-year growth of 21.7%. Lending to the retail segment performed outstandingly well, particularly consumer finance (up 23.6%), credit cards (up 43.5%) and to a lesser extent mortgage lending (up 14.2%). This is reflected in a year-on-year gain in market share of 16 basis points in the individual segment, according to the latest available information as of October 2013.

This rise in lending activity has been coupled with strict risk admission policies and a good management of recoveries. These lines of action, which are closely in line with those for the whole group, have improved the main risk indicators over the quarter. The NPA ratio as of 31-Dec-2013 stood at 2.1% and the coverage ratio at 141% (2.2% and 137%, respectively, at the close of September 2013).

Customer deposits under management closed December at €58,881m, and have continued to increase their year-on-year rate of growth to 30.0%. Lower-cost transactional items (current and savings accounts) have driven this growth, with a rise of 42.6% over the period and a market share gain of 73 basis points from October 2012 to October 2013. Including assets under management by mutual funds, customer funds managed by the banks in South America totaled €61,833m, up 28.3% on the same date the previous year, with a rise in market share over the year of 30 basis points, again using data for October 2013. (In fact, all the figures below on market share refer to October 2013, the latest information available.)

By countries, the highlights of banking activity are as follows:

- **Argentina**. The loan book performed very well, with year-on-year growth of 246% thanks to a boost from credit cards (up 55.5%). As a result, market share increased 47 basis points for this portfolio. Customer funds grew by 27.8%, with good performance of both current and savings accounts and time deposits.

- **Chile**. The loan book grew by 7.3% over the quarter, strongly supported by the outstanding growth in the mortgage portfolio (up 13.4%), which gained 32 basis points in market share over the last 12 months. Customer funds have increased at a year-on-year rate of 15.5%, with an increase in the time deposit balance of 16.0% and a gain in market share of 3 basis points.

### Performing loans breakdown

- **Colombia**: Lending activity has increased (up 21.1% year-on-year) more than the system as a whole, with the result of a gain of 53 basis points in market share over the year. By portfolios, there was strong performance in consumer finance and corporate lending, which increased their market share by 103 and 49 basis points, respectively. Customer funds grew by 14.7%, and market share increased by 104 basis points, focused on the good performance of more transactional items, which rose by 15.5% and gained 123 basis points in market share over the year, while time deposits increased market share by 70 basis points.

- **Peru**: A significant rise in lending (up 20.0%), focused on mortgage loans, which led growth at 18.1% in year-on-year terms. The 21.9% growth in customer funds reflects the boost from transactional items, which rose year-on-year by 25.4%.

- **Venezuela**: The strength of activity shown over the year continued into the fourth quarter, with lending up 64.5% and customer funds by 76.3%, and gains in market share of 3 and 36 basis points, respectively. In lending, there was notable growth in credit cards (up 77.4% and a gain of 165 basis points in market share) and corporate lending, which has increased almost tenfold since the close of 2012 and has gained 22 basis points in market share. In customer funds, there was a significant rise in current and savings accounts (up 90.6%, with a gain in market share of 54 basis points).

### Breakdown of customer deposits under management

- **Colombia**: A significant rise in lending (up 20.0%), focused on mortgage loans, which led growth at 18.1% in year-on-year terms. The 21.9% growth in customer funds reflects the boost from transactional items, which rose year-on-year by 25.4%.

- **Peru**: A significant rise in lending (up 20.0%), focused on mortgage loans, which led growth at 18.1% in year-on-year terms. The 21.9% growth in customer funds reflects the boost from transactional items, which rose year-on-year by 25.4%.

### South America

- **Argentina** had a net attributable profit of €119m, reflecting positive evolution of revenue, particularly NTI, despite the impact of the low inflation rate on the return on indexed assets.

- **Chile** increased its net interest income significantly, thanks to the boost from activity and maintenance of spreads, which has offset the increase in expenses and loan-loss provisions, the latter in line with lending, and generated a net attributable profit of €296m.

### Impairment losses on financial assets increased significantly to €701m, affected by the high level of recoveries and one-off items booked in 2012. Not including these effects, the growth of 26% is in line with the strength of activity.

- Overall, South America generated a **net attributable profit** in 2013 of €1,249m, a year-on-year rise of 22.6%.

This can be broken down by **country** as follows:

- **Argentina** has generated a net attributable profit of €214m (up 39.2% year-on-year), supported by the strength of recurring revenue (boosted by increased activity and good price management, which have offset increased expenses and loan-loss provisions).

- **Chile** had a net attributable profit of €119m, reflecting positive evolution of revenue, particularly NTI, despite the impact of the low inflation rate on the return on indexed assets.

### Earnings

**Gross income** for 2013 amounted to €5,630m, 25.3% up on the figure for the same period the previous year. This positive performance is a result of the area’s capacity to generate recurring revenue, thanks to the boost to activity in all geographical areas and the maintenance of customer spreads. Net interest income for 2013 was €4,703m (up 33.6% year-on-year) and income from fees and commissions was up 27.7% to €976m. NTI also performed very well, doubling the figure for the previous year, largely influenced by the revaluation of BBVA Provincial’s U.S. dollar positions in Venezuela, due to the aforementioned devaluation of the bolivar. Lastly, other income/expenses was weaker in the quarter as the adjustment for hyperinflation in Venezuela was more negative than in 2012, which offset the good performance in the insurance business in the area.

On the side of costs, South America is continuing with its expansion and technological transformation plans in order to take advantage of the growth opportunities presented by the region. An example of this is the launch of the new Strategic Plan for 2013-2016. These factors, combined with the high inflation in the area, explain why operating expenses have remained high, with a year-on-year increase of 23.2% to €2,386m. The efficiency ratio has improved on the third quarter of 2013 and ended the fourth quarter at 42.4%. Finally, **operating income** stands at €3,244m, up 270% on the figure reported in the same period in 2012.

**Impairment losses on financial assets** increased significantly to €701m, affected by the high level of recoveries and one-off items booked in 2012. Not including these effects, the growth of 26% is in line with the strength of activity.

- Overall, South America generated a **net attributable profit** in 2013 of €1,249m, a year-on-year rise of 22.6%.

This can be broken down by **country** as follows:

- **Argentina** has generated a net attributable profit of €214m (up 39.2% year-on-year), supported by the strength of recurring revenue (boosted by increased activity and good price management, which have offset increased expenses and loan-loss provisions).

- **Chile** had a net attributable profit of €119m, reflecting positive evolution of revenue, particularly NTI, despite the impact of the low inflation rate on the return on indexed assets.

- **Colombia** increased its net interest income significantly, thanks to the boost from activity and maintenance of spreads, which has offset the increase in expenses and loan-loss provisions, the latter in line with lending, and generated a net attributable profit of €296m.
• **Peru** registered a net attributable profit of €167m, based on increases in net interest income and NTI. Income from fees and commissions slowed due to the effect of the Transparency Act, which limits banks from charging certain fees.

• **Venezuela** has increased its net attributable profit substantially (up 63% year-on-year) to €369m, thanks to strong activity and the positive effect of the revaluation of the bank’s U.S. dollar positions following the devaluation by the Venezuelan government in February.

• Lastly, **BBVA Paraguay** reported a cumulative net attributable profit of €22m and **BBVA Uruguay** €24m.

**Main highlights**

In **Venezuela**, BBVA Provincial has launched a comprehensive communication campaign to boost multi-channel banking and attract 1,900,000 new customers between 2013 and 2016 through the use of digital channels. With the aim of positioning itself as the most important digital bank in the country in terms of innovation, BBVA Provincial has also developed the “Fan Test”, the first social TV initiative carried out by a bank in Venezuela (combined use of television, the social media and mobile devices).

The most important **awards and recognitions** received during this quarter are as follows:

• BBVA won the most votes from companies choosing the “Best Bank for Emerging Latin American Currencies” at global level in the ranking prepared by the specialist magazine **FX Week**

• The “Yo Elijo BBVA” (I choose BBVA) campaign launched by BBVA Francés in Argentina has won the “Eikon de Oro” 2013. These prestigious awards recognize the work carried out by companies in Argentina in institutional communication.

• BBVA Colombia and BBVA Provincial in Venezuela have been rated the best providers of cash management services in 2013 by the magazine **Euromoney**.

• In Peru, BBVA Continental has been recognized by the magazine **América Economía** as one of the best banks in Latin America, with second place in the ranking of the “25 best banks in Latin America”.

• BBVA Uruguay has received the citizens’ excellence prize awarded for the second year in a row from the Latin American Development Center (CELADE) for its best practices in corporate responsibility.

Lastly, South America continues to be very active in social responsibility programs. Outstanding in this respect are:

• BBVA Colombia has joined the “Cuento Contigo” (I count on you) campaign to stock libraries in more than 2,500 schools. This allows bank’s customers to contribute to the country’s development through reading each time they make a withdrawal or cash deposit in an ATM.

• Also in Colombia, BBVA and Paga Todo have announced a partnership to open 140 banking correspondents in Bogota and Cundinamarca. This shows BBVA’s commitment to the country’s economic and social development, which involves increasing banking penetration.

• BBVA Francés in Argentina and BBVA Chile have focused on financial literacy workshops. In Chile, the Group is active in three initiatives aimed at school-age children, young people and the employed, teaching subjects such as basic financial concepts, responsible spending and credit health. In Argentina, BBVA Francés volunteers have taken part in a meeting with school students in which they were lectured on the importance of money and the function of banks.

(1) Panama, Paraguay, Uruguay and Bolivia. Additionally, it includes eliminations and other charges.
In 2013, the Corporate Center’s results were a loss of €999m, compared with earnings of €823m the previous year. These figures are heavily conditioned by the closing of several corporate operations carried out by the Group throughout the year. As stated on several occasions in this report, with the aim of guaranteeing a homogenous comparison of the accounts, all the effects derived from these Group decisions have been transferred to a new heading, called “results of corporate operations”. In 2013, this heading registered €383m and basically includes the effects of the following items:

- Earnings from the Group’s pension business in Latin America and the capital gains from the sale of the different companies (Mexico in the first quarter, Colombia and Peru in the second, and Chile in the fourth).

- The capital gain from the sale of BBVA Panama (fourth quarter).

- The impact of the new agreement with the CITIC group (fourth quarter), basically the mark to market of BBVA’s stake in CNCB and the equity-accounted earnings from CNCB (not including dividends) from previous quarters.

In 2012, results from corporate operations amounted to €1,303m and included:

- The badwill generated in the Unnim operation.

- The earnings from the sale of BBVA Puerto Rico.

- And the figures from the pension business and the equity-accounted earnings from CNCB (not including dividends) for that year.

### Asset/Liability Management

The Assets and Liabilities Management unit is responsible for managing structural interest-rate and foreign-exchange positions, as well as the Group’s overall liquidity and shareholders’ funds.

</table>
Furthermore, the Bank has exercised the call on a subordinated debt issue by BBVA Bancomer for 3,000m Mexican pesos. In Peru, Banco Continental has completed a 15-year $45m issue.

In October, BBVA paid its traditional second interim dividend using the “dividend-option” shareholder remuneration program, which offers shareholders a broader range of remuneration alternatives for their shares. On this occasion, the holders of 88.3% of free allotment rights opted to receive new shares. Therefore, the number of ordinary BBVA shares issued under the paid-up capital increase was 61,627,952, with a capital saving of 15 basis points.

Lastly, turning to regulation, Royal Decree 14/2013, dated November 29 aims to adapt the European regulations CRR 575/2013, dated June 26, and CRD 2013/36, dated June 26. It came into effect as Spanish Law in January 2014, and includes the change in the treatment of deferred tax assets, in line with the regulation in force in other States of the European Union. The latter improves the forecast for core equity tier I under BIS III regulations for the BBVA Group.

With respect to the management of exchange-rate risk of BBVA’s long-term investments, the results are included in the Corporate Center and explained in detail in the Risk Management section, under the sub-section on “Structural Risks”.

The Bank’s capital management has a twofold aim: to maintain levels of capitalization appropriate to the business targets in all the countries in which it operates and, at the same time, to maximize return on shareholders’ funds through the efficient allocation of capital to the various units, good management of the balance sheet and proportionate use of the various instruments that comprise the Group’s equity: common stock, preferred securities, conditional convertible bonds and subordinated debt.

During the quarter, BBVA has closed the sale of 5.1% of its stake in CNBC. This sale has a positive impact on the Group’s solvency, particularly under the new BIS III regulations.

Furthermore, the Bank has exercised the call on a subordinated debt issue by BBVA Bancomer for 3,000m Mexican pesos. In Peru, Banco Continental has completed a 15-year $45m issue.

In October, BBVA paid its traditional second interim dividend using the “dividend-option” shareholder remuneration program, which offers shareholders a broader range of remuneration alternatives for their shares. On this occasion, the holders of 88.3% of free allotment rights opted to receive new shares. Therefore, the number of ordinary BBVA shares issued under the paid-up capital increase was 61,627,952, with a capital saving of 15 basis points.

Lastly, turning to regulation, Royal Decree 14/2013, dated November 29 aims to adapt the European regulations CRR 575/2013, dated June 26, and CRD 2013/36, dated June 26. It came into effect as Spanish Law in January 2014, and includes the change in the treatment of deferred tax assets, in line with the regulation in force in other States of the European Union. The latter improves the forecast for core equity tier I under BIS III regulations for the BBVA Group.
CIB highlights in the fourth quarter

- New improvement of the commercial and liquidity gaps.
- Strength and quality of revenue.
- Cost control.
- Reduction in loan-loss provisions.
- High contribution from Global Transactional Banking and Global Markets.

Highlights

The main highlight in wholesale business activity is a further improvement in the commercial and liquidity gap, as a result of the positive performance in customer deposits and CIB’s strategy based on a customer-centric approach, cross-selling and prioritizing profitability over volume.

In earnings, it has been an excellent year due to the strength and quality of gross income, driven by the positive performance in the Global Transactional Banking and Global Markets units, cost control and the reduction in loan-loss provisions.

Macro and industry trends

After the slowdown seen in the first half of the year, the upturn in growth in the global economy, already apparent in the previous quarter, has continued in the latter part of 2013. This has had a positive impact on financial markets in late 2013, once the uncertainty, particularly regarding the expansive monetary policy applied by the Fed, was dispersed. The economic authorities have also implemented certain measures that have contributed to remove a number of risks.

The breakdown of the activity and earnings of the BBVA wholesale business is shown below. Unless otherwise indicated, all the comments on changes below refer to constant exchange rates. Due to the aforementioned widespread depreciation in currencies, which had an impact on the Group’s financial statements against the euro, the exchange rate has a negative impact on the year-on-year change.

(1) Figures at constant exchange rates.
(2) Excludes repos.

in both earnings and in balance sheet and activity, and not only in the quarter but also for the year as a whole.

Activity

As of 31-Dec-2013, CIB reported a new quarterly fall of 4.9% in customer lending, to €45,355m. Over the last 12 months, the reduction rate has slowed and stands at -2.0%. This performance is due, once again, to the lower balances in Europe and, to a lesser extent, in the United States. In this regard, wholesale customers in Spain have reduced their exposure with BBVA by 12.3% since September 2013 and by 7.2% since the end of 2012. In Eurasia, the quarter-on-quarter and year-on-year declines were 9.1% and 11.9%, respectively. While in United States they were 1.9% and 2.8%, respectively. In contrast, there was positive performance in Mexico, with a particularly buoyant wholesale portfolio in the latter part of the year, showing year-on-year growth of 14.7%, and also in South America (up 71% in the quarter and 14.0% over the year).

The performance in customer deposits under management has improved compared to previous quarters, and their growth has increased during the quarter (up 11.2%) and also over the last twelve months (up 30.6%). As of 31-Dec-2013, they amounted to €34,750m. The main reason for this strong performance has once again been the diversification in geographical areas, customers and products.

These factors have led to further improvement in the commercial and liquidity gaps of the Group’s wholesale banking business.

Earnings

Earnings in this area in 2013 show great strength in each one of the lines of the income statement. This is the result of a strategy based on prioritizing profitability over volume, efficient management and an increase in transversality and diversification of geographical areas, of products and customers. All this has led to a cumulative net attributable profit of €1,267m, a year-on-year increase of 33.4%.

On the revenue side, gross income amounts to €3,036m, a 20.2% increase over the same period the previous year. Most of this growth stems from the Global Transactional Banking and Global Markets units.

Another reason for the improved earnings in CIB has been the efforts made to control costs. At year-end, total operating expenses stood at €900m, a year-on-year increase of 4.0%. These efforts to keep expenses under control are even more relevant taking into account the Bank’s ongoing commitment to innovation and, thus, the investments it makes to be at the cutting edge of technology. In addition, BBVA carries out this activity not only in mature markets, but also in emerging geographical areas with high inflation rates and which are undergoing various expansion and development plans. Thus, operating income totals €2,136m euros, up 28.6% on the figure for the same period in 2012, which brings the efficiency ratio to 29.6%, at similar levels to the first nine months of 2013, i.e. an improvement of 3.9 percentage points over the ratio reported in 2012.

Lastly, compared to the average for previous quarters, there has been a decline in impairment losses on financial assets, which is why this heading’s accumulated amount to December

CIB. Operating income
(Million euros at constant exchange rates)

CIB. Net attributable profit
(Million euros at constant exchange rates)

(1) At current exchange rates +20.9%.
(2) At current exchange rates +26.9%.
is still below the levels for the same period in 2012: €94m (down 431% year-on-year).

Main highlights

The most relevant deals carried out by the different CIB departments and the highlights of the fourth quarter of 2013 are summarized below.

The Merger & Acquisitions unit, which specializes in the corporate finance business, maintains its leading position in Spain as M&A financial advisor. The most important deals in the fourth quarter were the sale of Sarenet, by Vocento and a private investor, to Springwater, the sale of 5% of CLH to Ardian and the issue of a fairness opinion on Novartis for the Board of Directors of Grifols. In Mexico, this unit has also performed strongly. The unit has advised Suez Environment and the Peñoles group in the sale of 50% of DHC to GMD, and advised Coflox in the acquisition of 56% of the Sicelub Lubritech group.

In Equity Capital Markets, BBVA has taken part as co-manager in the IPO of CTT, Portugal’s postal services company, and as underwriter in the Barclays capital issue with subscription rights. In Mexico the unit led the initial public offerings of Fibra Danhos, Grupo Lala and CKD de Artha. It also took part as book runner in the Actinver share capital increase. In Chile the unit led the share capital increase with subscription rights of Quíñenco.

In Corporate Lending, BBVA continued to lead the most important deals on the Iberian market (syndicated loan to Enagas, bridge to bond for Grupo Antolin, funding to Grifols for the acquisition of a Novartis division, among others). In Europe, BBVA won the Dufry International AG deal and acted as joint-book runner in the HY bond for the Italian company Astaldi. In Latin America, BBVA led the financing of acquisitions of CFR in Chile, American Tower and Alsea in Mexico and Hochschuld in Peru. In the United States, BBVA Compass has arranged credits for Chicago Bridge & Iron and Colfax.

In Project and Leveraged Finance, BBVA has advised Saba on the concession of parking lots for Adif railroad stations and the University of Granada for funding an entrepreneur center. It also took part in the structured syndicated deal for Aliseda, a real-estate management company belonging to Banco Popular. Worth mentioning in Latin America are the asset financing transactions for Gasoductos de Chihuahua and the Playa Hotels Project in Mexico, the Port of Callao in Peru and the funding for the acquisition of Globenet in Brazil. In the United States, BBVA acted as joint lead arranger, co-documentation agent and hedge provider in the NET Mexico pipeline for ArcLight and NET Midstream.

In Global Transaction Banking, credit facilities have been concluded with two Spanish companies for the construction of the North Tarrant highway in Dallas, a hedging policy has been arranged for the issue of three advance payment bonds for the construction of the Riyadhy subway and two stand-by letters of credit have been issued for a major air carrier, to guarantee the purchase of two fuel ships. In Mexico, BBVA was selected to manage the accounts receivable and payable of the country’s main vehicle insurance company. Worth mentioning in new products and functionalities in Europe are the presentation of the new App “BBVA net cash” for mobile devices and the “SEPA File Test”, which enables users to check SEPA collection and payment forms before sending orders. Lastly, the Global Custodian magazine has named BBVA “Top Rated” in the “Agent Banks in Major Market Survey 2013”.

Global Markets ended 2013 with a significant increase in annual gross income of 26.1% to €1,282m euros. This increase is largely the result of its customer-centric business model, whereby customers are able to make the most of the business opportunities that arise, within the broad range of markets in which BBVA operates. It also carefully examines the sustainability of each proposal using stringent risk control and an efficient use of liquidity. The success of the Global Markets strategy has been recognized by a number of awards. For example, Euromoney recently ranked BBVA CIB as the “Best Investment Bank in Spain” and Latin Finance chose BBVA Bancomer as the “Best Investment Bank in Mexico”.

By geographical areas, in Europe there has been excellent performance in the equity business and increased activity in the global public finance segment (up 73% year-on-year).

In Spain, BBVA is once again at the top of the Spanish Stock Market ranking, with a market share of more than 18%, and is the leader in debt capital markets, with a market share of 14% in total issues and 24% in public sector issues. Structured Products has also ranked it as the “Best Financial Institution in Spain for Structured Products”.

In Asia, BBVA’s strong activity with corporates stands out (up 12% year-on-year), as does its credit revenue growth (up 14%).

In Mexico, Global Markets has consolidated its leadership in the country and has reported positive performance in customer revenue, thanks to the synergies with the networks. By product, equity brokerage revenue has been outstanding (up 74% year-on-year).

In South America, the strong performance in foreign exchange revenue (up 67% year-on-year), and the growing penetration both in the institutional customers (up 6%) and corporates (up 11%) segments are particularly noteworthy.

In the United States there has been a significant increase in the contribution from the institutional customers segment (up 45% year-on-year in revenue).

Conciliation of BBVA Group financial statements

Below are the Group’s financial statements with and without the early application of IFRS 10, 11 and 12. The early application of these standards means consolidating the stake in Garanti Group by the equity method instead of by the proportional consolidation method. In terms of reporting to the market, the proportional consolidation method is better for evaluating the nature and financial effects of Garanti Group’s business activities, consistent with the information from previous periods, and more coherent in its effects on capital adequacy. Moreover, the inclusion under the heading “Results from corporate operations” of all the impacts of such operations (which are described in this report) on the BBVA Group’s earnings and the reconstruction, where applicable, of the historical series to guarantee a homogeneous comparison of the accounts.
